Reference: Indiana Environmental Stewardship Program Annual Performance Report

March 17, 2020

Dear ESP.

Please find attached the 2019 Indiana Environmental Stewardship Program Annual Performance Report and associated Attachments to aid in the review of AstraZeneca Pharmaceuticals, LP's (AstraZeneca's) application. In addition, this cover letter will also provide pertinent descriptions related to the Initiatives outlined in the application Section E:

Initiative #1: Water Consumption Reduction Initiative

AstraZeneca devoted much of 2019 to improvement of the water system infrastructure (e.g., fire protection water loop) and other water line maintenance/repair that are deemed to be near end-of-life. Additional infrastructure improvements are proposed in future years to help improve water quality at the site. Initiative #1 provides data to show efficiency improvements in our operational cleaning process that have resulted in significant reductions in water consumption with improved production.

Initiative #2: Energy Consumption Reduction Initiative

AstraZeneca re-engineered several processes in the facility that further improved energy efficiency, which included, but was not limited to: LED lighting retrofits, fan array installation, process area air exchange rate optimization, and variable frequency drive installations. Initiative #2 provided data to show energy improvements realized in 2019.

Initiative #3: Zero Waste to Landfill Initiative

AstraZeneca is targeting the removal of wastes to landfill by the year 2021. Initiative #3 provides data of landfill waste weights in 2015 and in 2019. Significant outcomes were accomplished in 2019 that required waste processing changes and installation of additional waste compactor(s) onsite that will allow us to divert our wastestreams to a waste-to-energy facility. This initiative will continue through 2021.

Furthermore, this document includes Sustainability Project Summary Sheets that provide more details of select Sustainability / Environmental Improvement activities conducted at AstraZeneca in 2019.

Thank you for your time reviewing our application. Should you have any questions, please contact me at your convenience.

Sincerely

AstraZeneca Pharmaceuticals, LP

Kevin D. Conkright Sr. SHE Specialist

Indiana Environmental Stewardship Program Annual Performance Report

INDIANA ENVIRONMENTAL STEWARDSHIP PROGRAM ANNUAL PERFORMANCE REPORT

State Form 53475 (R6 / 2-19)
INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
ENVIRONMENTAL STEWARDSHIP PROGRAM

Indiana Department of Environmental Management Office of Program Support

MC 64-00, Room IGCN 1316 100 North Senate Avenue Indianapolis, IN 46204-2251 Telephone: (800) 988-7901 FAX: (317) 233-5627

FAX: (317) 233-5627 E-mail: esp@idem.IN.gov

Please use this form if you are a member of the Indiana Environmental Stewardship Program (ESP) to report on progress toward objectives and targets AND certify ESP requirements continue to be achieved. Indiana ESP facilities must submit an Annual Performance Report (APR) by April 1st of every year, for each calendar year in which the entity has been a member for at least three (3) full months. Membership terms are renewed every four (4) years through submitting your APR. Your APR should be reviewed and signed by a senior manager at your facility prior to submittal. Once signed, e-mail the APR to IDEM at esp@idem.IN.gov. Please do not include any confidential business information in your annual performance report. Public access laws require IDEM to make the APR publicly available, which may include posting all portions of your report on the Indiana ESP Web site. If you have any questions, please contact IDEM at esp@idem.IN.gov or (800) 988-7901.

SECTION B

PUBLIC OUTREACH AND PERFORMANCE REPORTING

Why do we need this information?

IDEM needs to know how environmental information was shared with the

What do you need to do?

Describe how the facility has shared and plans to share environmental information.

Please briefly describe the activities that your facility conducted during this reporting period to interact with the community on environmental issues and to report publicly on its environmental performance. AstraZeneca - Mount Vernon held several events in 2019 that included an Earth Day Celebration focused upon a sustainable environment, and a Recycling Day. We report publically through AstraZeneca - Global where our data is included in Sustainability Report for DJSI.

Please indicate which of the following methods your facility plans to use to make its ESP Annual Performance Report available to the public. Please check as many as appropriate.

repor	t cumulative program reduction	results		section. Summarize your facility's progress on achieving u identified in the application or last year's APR. For
Initia	 tive #1		assistance, ple	ase call (800) 988-7901 or email esp@idem.IN.gov.
	gory 1:	Decelie -		
	ator 1:	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
	dar year	2015	2019	NVA
Actua	I quantity (per year)	79,660,274 Gallons	79,580,389 Gallons	N/A N/A
Produ	ction unit (select one)	Earned Labor Hours Ta	ablets Production units Prod	duction lbs.
Produ	ction Quantity	1.358 Billion	2.730 Billion	NA
Norma	alization factor (Current year pr	oduction + Baseline year produ	ction) 2.01	
Norma	alized quantity (Actual current y	ear quantity - Actual baseline q	uantity) x Normalization factor	-160,568 Gallons

Briefly describe how you achieved improvements for environmental initiative #1 or, if relevant, any circumstances that delayed progress. We are currently making twice the amount of tablets with the same amount of water, which is due to lean activities associated with production consumption. as well as, improved efficiency of our cooling tower system. More projects are scheduled for 2020-2021 that are targeted to reduce water usage.

SECTION E	ENVIRONMENTA	L IMPROVEMENT INITIATIVE R CONTINUED	ESULTS
Initiative #2			
Category 2:Indicator 2:	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
Calendar year	2015	2019	N/A
Actual quantity (per year)	112,341 MWH	102,115 MWH	\$839,045
Production unit (select one)	Earned Labor Hours Tab		tion lbs.
Production Quantity	1.358 Billion	2.730 Billion	NA
Normalization factor (Current ye	ar production ÷ Baseline year prod	duction) 2.01	
Normalized quantity (Actual curr	ent year quantity - Actual baseline	quantity) x Normalization factor	20,554 MWH

Briefly describe how you achieved improvements for environmental initiative #2 or, if relevant, any circumstances that delayed progress. We are currently twice the amount of tablets produced using less energy (MWH) than we did in 2015, which is attributed to Natural Resource Reduction Projects that include new equipment installations (e.g., fan banks, air exchange rate optimizations), which improves our overall energy usage.

Initiative #3			
Category 3:Indicator 3:	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
Calendar year	2015	2019	N/A
Actual quantity (per year)	717 mT to landfill	102 mT to landfill	N/A
Production unit (select one)	Earned Labor Hours Tat Other specify (e.g. Galle		duction lbs.
Production Quantity	1.358 Billion	2.730 Billion	NA
Normalization factor (Current year	ar production ÷ Baseline year prod	luction) 2.01	

Normalization factor (Current year production ÷ Baseline year production) 2.01

Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor 1,236 mT

Briefly describe how you achieved improvements for environmental initiative #3 or, if relevant, any circumstances that delayed progress.

AstraZeneca is targeting zero waste to landfill by 2021. Improvement in waste diversion to landfill was accomplished by changing waste collection program to route as fuel source for energy recovery.

- 1. Briefly describe the *impacts or wastes* eliminated resulting from the environmental initiative(s). If multiple initiatives, please indicate which specifically. Please see the attached sustainability project summaries for details associated with our continued environmental impact improvement initiatives.
- 2. Are there other best management practices (BMPs) you can share correlating to your initiative(s)?

Correlated data with a process assessment (internal or external) is important to identify the highest potential for process/economic improvement, which will require challenging the "Status quo"

3. If the objectives and targets associated with the environmental improvement initiative(s) were not attained, please verify continued progress toward the environmental initiative(s). If multiple initiatives, please indicate which specifically.

AstraZeneca will quantitatively measure improvements made in 2019 in 2020 (and beyond) to verify engineering design and forecasts. Objectives and tagets appeared to be met for 2019.

4. Please provide a narrative summary of progress made toward qualitative, significant EMS objectives and targets, if any.

Please see attached sustainabiliy project summaries for qualitative and significant EMS improvement narratives.

5. Please list any state, U.S. EPA None identified.	A, or other partnership programs to whic	ch you are reporting this data	a (e.g., Energy Star, Proj	ect XL).

Sustainability Project Summaries

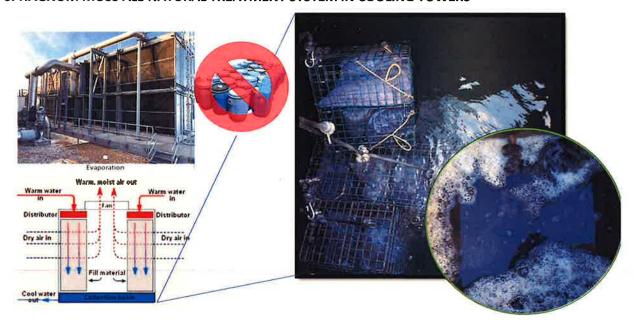

"AIR HANDLING UNIT FAN ARRAY BANK - SOMETIMES MORE IS SUSTAINABILY BETTER"

Providing the right amount of air ventilation at the right time is a balancing act when talking about sustainability. Having too much means we are using more natural resources to maintain temperature, pressure, and humidity; having the right amount means sustainable bliss. In Building 122, we removed two single, fixed speed, belt driven, supply fans and replaced them with a fan array assembly consisting of more than 12 small, direct drive (efficient) motors and variable frequency drives. This fan array allows us optimal airflow as we can bring more fans online when needed for operations; but when they are not needed, we run only those needed to maintain our room climate. The result was more than \$160,000 per year savings in electricity, gas, and water consumption, which equates to a nice reduction in our carbon footprint.

SPHAGNUM MOSS ALL-NATURAL TREATMENT SYSTEM IN COOLING TOWERS

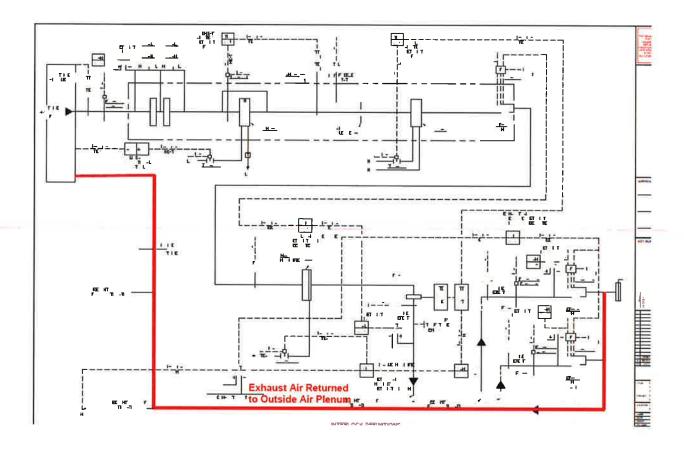

Approximately 1.1 billion people (1 in 7) lack access to safe, fresh water. As an industry, we need fresh water to maintain our operations with a large amount of this precious resource used in cooling towers. Typically, incoming water is chemically treated to meet water quality and then treated again prior to discharging to meet effluent standards.

At Mt. Vernon, we have implemented an innovative, natural, and sustainable water management process for our cooling towers by using sphagnum moss in lieu of chemicals that achieves three sustainable goals: 1.) eliminates the vicious chemical treatment cycle, 2.) reduces water demand for the cooling tower as flushing is greatly reduced and 3.) improves the quality of water released. Oh, and by the way, studies show that sphagnum moss functions as a carbon sink, which actively participates positively in the carbon cycle.

"AIR HANDLER SINGLE PASS AIR SYSTEM ELIMINATION — IMPROVED EFFICIENCY, IMPROVED SUSTAINABILITY"

One-pass air is defined as air that we pull directly from the environment external from the facility and use to achieve our room exchange rates. It is filter-cleaned, heated, and moisture conditioned to the extent necessary to maintain a safe and clean room environment. We eliminated one-pass air, and created a closed, recirculation loop from the exhaust airstream back into the plenum upstream of the filter equipment and reduced air changes to 4 production rooms at 10 air changes/hour. By returning air to the AHUs and reducing air changes, the energy required to condition the remaining outside air is significantly reduced. Spent \$500k and realized energy savings > \$150,000/year with a combination of savings in electricity, natural gas, chilled water, and steam. These savings together help us to be more sustainable while providing the same room climate.
